Class	Test												
PlannerFragmentTest	checkMealPlannerSaves												
PlannerFragmentTest	searchAndAddToPlanner												
PlannerInfoFragmentTest	searchAndAddToPlanner												
ProfileSettingsTest	testPrivacyInfolsStoredAndRetrieved												

Comments:

searchAndAddToPlanner – will keep failing until planner search is fixed, currently being worked on.

ProfileSettings – passing when run individually just not all together

CheckMealPlannerSaves – failing looking for lets cook, because meal planner searching is failing.

Searching is being redeveloped which is causing the tests to fail, tests have not been removed from the application.
