Detailed report

05/11/2020 - 05/17/2020

Finance Managers Comments:

Total: 50:45:00 Billable: 50:45:00 Amount: 634.38 GBP

The team had predicted 31 hours for this week, week 4 of iteration 3. We have gone over on estimated hours in total of 21.25 for the entire project. We have gone over on hours this week by 19.75 so have reduced the company redundancy which now stands at £727.17 extra in the pot. The company remains in a comfortable place financially.

From going under last week, some of the team still have some exams left but the team is starting to return concentration to the SWEng effort in order to bring iteration 3 to a strong ending. To that end the team has gone over in hours but we have the redundancy to do so and since lifting hour restrictions last week the team has taken that into play with this week of labour.

The team remains in a strong place financially and the restriction will remain off until the team has finished with a product we can be proud of.

Project Managers Comments:

Echoing the Financial Manager, The company looks to be in a healthy position right up until the release date of the application. With maximum focus being brought back onto the project, we will be looking at ramping up the hours in development to make sure the application is as polished as possible and that any changes that need to be made as per the Design Survey results, can be made.
