Finance Managers Comments:

The team had predicted 29.25 hours for this week, finishing iteration 1. It was found however that a team oversight had lead to no time allocation for the Test and Iteration plan. We have had 25 % of user stories given to testing in general, but nothing had gone into the Test and Iteration plan. During this week, 17 hours has gone into the Test and Iteration plan, last week 3 hours went into it. When asked during the predition phase of the project, the test team had not brought up this deliverable and thus was missed. Due to this oversight we are over budget this week, taking from the balance of time the team have built up over Iteration 1, the team is now 3.25 hours over going into Iteration 2.

Looking at the current financial situation of the group as a whole this week however, we can identify that, due to excellent sales of Modules, we have £952.17 more in the bank than predicted. This will enable to team to put in extra hours where necessary during this iteration to finish in a strong position, with all necessary features completed.

Project Managers Comments:

As project leader I take full responsibility for the oversight that has led to extra hours needing to be worked for this week. My initial assumptions on what was required for the Testing and Integration plan were greatly underestimated when originally put forward to the group in our initial predictions. This then led to the needing of extra hours from other members of the development team.

All in all, finances are healthy and having the financial buffer to cover for any problems that may arise going forward is a great asset.
