Detailed report

03/30/2020 - 04/05/2020

Total: 48:15:00 Billable: 48:15:00 Amount: 603.13 GBP

Finance Managers Comments:

The team had predicted 28.5 hours for this week, week 3 of iteration 2. We have gone over on estimated hours in total of 52.5 for the entire project. At then end of last week, the team had an extra £583.42, this week we are still in the positive but from the extra work that has gone in this week we are at £336.54 extra in the pot, using up some of this redundancy.

The reason for this this over time is due to the team spending extra time on the most crucial parts of the application. These include adding recipes, building a strong searching capability and building the social feature that will work and promote repeat customers within our userbase. With these features holding the key selling points of the application it is crucial to get these correct, moreover as these key feature develop the team is uncovering new challenges and new solutions which will make the application not only functional but bring relish to these aspects.

As a result of this, the team has gone over estimations for these stories, along with previous stories needing to be revisited to function with these stories. With active financial management I am allowing for this overtime with the spare capacity the team currently holds.
