Test Results:			
<p>Individual automatic Espresso tests all passed individually.</p> <p>Two espresso tests were constructed to:</p> <ul style="list-style-type: none"><li>• Check correct navigation around social aspects of the profile</li><li>• Check correct navigation to notifications</li></ul> <p>In doing this we tested:</p> <ul style="list-style-type: none"><li>• Posts and social features display in correct places</li><li>• Notifications display in correct location</li></ul> <p>Tests consisted of using espresso to open and log into the application, Notifications and Profile are both navigated through and around.</p> <div> Tests passed: 2 of 2 tests – 34s 850ms</div> <p>Manual testing:</p> <p>Manual tests were constructed to:</p> <ul style="list-style-type: none"><li>• Find another user and following them</li><li>• Ensure that private users have their profile properties hidden to other users</li><li>• Ensure a public user could be instantly followed</li><li>• Ensure a private user could be requested to followed</li><li>• Ensure notifications populated correctly</li><li>• Ensure notifications could be accepted and deleted with the correct outcomes</li><li>• Ensure that a followed private user could be viewed with the correct privacy</li><li>• Ensure all navigation to profile is correct</li><li>• Ensure privacy settings alterations for enable changes operate as they should</li><li>• Ensure accounts can still be deleted with all extra information</li></ul> <p>Other tests:</p> <ul style="list-style-type: none"><li>• Check upgrade to login screen functional</li><li>• Unique usernames working correctly and populate with visual indications</li><li>• Complex passwords operational with visual indications</li><li>• Usernames also changed in profile settings</li></ul> <p>In doing this we tested:</p> <ul style="list-style-type: none"><li>• All profile features are operational</li><li>• Following and unfollowing of other users is functional both with private and public users</li><li>• Notifications work and can be accepted, giving follow access to private users</li><li>• Profiles can be navigated to via comments and posts.</li></ul>			

## Test Report

Comments:	
<p>NOTE: These espresso tests require up to date user profile – currently using credentials with <a href="mailto:scranplanapp@gmail.com">scranplanapp@gmail.com</a>. Espresso testing is unworkable with some side menus, also logging in with multiple users is unworkable so the majority of the tests with this story required manual testing.</p> <p>Extra features associated with previous stories fall into older tests that are operational. All visual effects were manually tested associated with these features including the new deletion of a user profile with added following and followers complications.</p>
