

Test Report

Test Report Title:	Kudos Test Report	Date	24/05/2020
User story:	A8		
Unit Test Results:			
			
<p>Test to click on kudos icon and see if it successfully sends kudos</p>			
Other Testing done:			
Comments:			
<p>Successfully clicks icon and sends kudos but I don't know how to stop it if the kudos icon has already been clicked. This will throw an error. Manual tests show that the application can handle multiple clicks without more kudos being given or the app crashing.</p>
