### Finance Managers Comments:

The team had predicted 29.75 hours for this week, week 3 of iteration 3. We have gone over on estimated hours in total of 1.5 for the entire project. We have gone under on hours this week by 6.5 so have added to the company redundancy which now stands at £974.04 extra in the pot. The company remains in a comfortable place financially.

Team members have been preoccupied by other commitments recently due to other deadlines and exams, however this period is coming to a close and the company having a large financial redundancy due to the sale of modules still, some of the hourly restrictions and being slightly loosened in order to allow team members to finish the project to the high standard we have come to expect. Hours will remain closely watched, but members are no longer required to request extra hours and instead, trust is in place that all extra hours used during this period are going toward perfecting all aspects of the application ready for the completion of iteration 3.

### Project Managers Comments:

Final push to get everything done we can. I have diverted some of our resources to the development of the HTML tour and to the start of the Presentation to allow us some breathing room towards the end. Main features are looking polished and are near completion.

Financially, in a very solid position giving us the ability to have a strong push before release to make sure that all features work as intended and that we have the quality of product that we strive for.
