

Test Report

Test Report Title:	Social feed, profile streams, posting and commenting	Date	20/05/2020
User story:	C28, C16, C31, C29, C24 Some extensions were added to these original stories to increase usability -> all changes laid out in change log with added time associated with them		
Test Results:			
Individual automatic Espresso tests all passed individually. Four espresso tests were constructed to: <ul style="list-style-type: none">• Check that user can navigate to feed and write a post adding both a review and recipe• Posts a new post to check if then displays in feed• Check that new posts also display in profile• Check that all sections for posts and recipes can be navigated through within profile In doing this we tested: <ul style="list-style-type: none">• Posting operates and users can attach all relevant items to posts• Posts display in all correct locations• Posts can be opened and commented on• Both feed and profile feeds operate correctly Tests consisted of using espresso to open and log into the application, Feed and Profile are both navigated through and around. New posts can be made and display in all the correct places and items can be attached to posts as they were intended to.			
<div>✓ Tests passed: 4 of 4 tests – 1m 22s 617ms</div>			
<u>Manual testing:</u> Manual tests were constructed to: <ul style="list-style-type: none">• Check user can navigate to the feed page• Post new posts including attaching pictures, recipes and reviews.• All attachments posts with post correctly and can be viewed in all sections of profile and feed.• Picture posts display with title and review when a picture is added and then with a picture and recipe.• Posts can be opened and viewed.• Comments can be added to posts.• Comments can be deleted.• Posts can be deleted from either post, feed or profile pages.• Users can only like a post once and that is saved.• Both comments and likes are numbered and saved.• Trending operated on home page as it should do In doing this we tested: <ul style="list-style-type: none">• All posting is operational.• Things that can only happen once only do happen once.• Everything can be updated correctly following posting.• Everything can be deleted correctly• Everything can be attached correctly.• All posts populate and do not populate where they should.• Trending on home page shows user rated recipes in order of rating (C28)

Comments:	
<p>NOTE: These espresso tests require up to date user profile – currently using credentials with scranplanapp@gmail.com. Espresso testing is unworkable with deleting posts as this menu cannot be accessed with Espresso. Manual tests were conducted and following a successful test, posts can be deleted. Due to the use of random numbers, espresso tests still function without deleting any posts.</p>
