

Test Report Title:	C5 Test report	Date	28/05/20
User story:	C5		
Unit Test Results:			
<p>Check that ingredients are added to the list. Saves the shopping list to users' profiles.</p> <p>Testing done to ensure all pages appear correctly and can be seen by the user</p> <p>Testing done that checks the correct ingredients are added to the list and they saved and displayed.</p>			
Other Testing done:			
<p><u>Manual testing</u></p> <p>A range of manual testing was done to cover all the different parts of this user story</p> <ol style="list-style-type: none"> 1. Testing that all of the same ingredients are added up and not displayed multiple times 2. Testing that the saved ingredient lists was saved when going from different pages of the app 3. Testing that ingredients can be removed from the list and on the saved list they stat removed however the shopping list that updates after every click is able to do that. 4. Ensuring that the correct saved list is displayed in fire base and that it matches the one shown on the screen. <p>Doing these ensures that the correct items were saved and stored in the correct places</p>
