

Team Meeting

Date: 24/03/20

Time: 10:00-10:30

Location: Skype

Meeting called by:	James Pearson	Type of meeting:	General Meeting
Facilitator:	James Pearson	Note taker:	Becky Anderson
Timekeeper:	Becky Anderson		

Attendees: Entire Group 4

Please read:

Please bring:

Minutes

Agenda item: Item #1

Presenter: James Pearson

Discussion:

Discuss the progress of the plan and current user stories being developed

Graphics handler given to Joe to test however Joe has come up with some issues. Mainly being there are 3 classes for shapes with no full functionality and unable to drag and drop and save location. Functionality needs to be decided. Joe suggested a set of arrays that can print the layout to make customise view possible. Take the custom view and put them into the classes that they gave.

the video handler has been implemented and done, Moved to the done part of trello.

Recipe info screen is continuously ongoing, unsure when it will be completed.

B4 has been removed. Not needed

xml parser has been merged with the master but some work left to be completed

C8 needs to be pull requested once all tests have been written and then can be merged

Joe to email stuart and make sure single reading of the presentation will be okay

text handler needs to be pulled into the master as it is done and is needed for other user stories

C4- pretty much done but needs testing and peer reviewed

C22 and C14- nearly done but some errors present so are hopefully going to be completed in the next few days

C12- started work on the API reading. Plan to get integration with tesco..ect and have a price update button that will check the online prices and automatically update. Current problem is when searching for food multiple options come up which often aren't the one wanted. Nathan is working on this.

Conclusions:

Talked through all current development and issues

Action items	Person responsible	Deadline
✓ Email to stuart checking requirements	Joe	End of the day
✓ Figure out graphics package and implement	JamesC and joe	Next week
✓ continue with current developments	All	On going

Agenda item: Item # 2 **Presenter:** James Pearson

Discussion:

Joe Design work, C15, Chef rating and Stripe payments

design for this iteration:

- we need fireframes for sections
- As part of peer review the design sound be checked. And issues that arris should be brought up by Joe at the next meeting

Chef rating

- Louis suggested that instead of a star rating for each chef a up rating feature instead. similar to Reddit and stack overflow
- There would also be a leader board for the most high points
- Gives more information about the chef and reduces the chance of someone putting zero starts and causing someone's rating to go down. Makes it a fairer playing field

Strip Payments

- Also Louis suggested using stripe payments as our way of getting subscriptions. Can set up different lengths of subscription through this. It deals with the back end of our payments.
- Suggestion that google pay also has these features so decided that louis was going to look into this and decided which was easier and to look into implementing this .

Action items	Person responsible	Deadline
✓ Design wireframes to be drawn	Joe	On going
✓ Decided between Stripe and google pay	Louis	On going
✓		

Agenda item: Item #3 **Presenter:** James Pearson

Discussion:

Plan going forward.

Louis is going to take charge of the social media side as has experience in this. Will need to use cloud functions and type script will be needed. Going to use 3 different collections so if you unfollow a user all their previous posts will also be removed.

As louis is taking the lead on the social side if you start working on a user story make sure to check in with him.

Conclusions:

Everyone to continue working and will have another meeting next week

Action items	Person responsible	Deadline
✓ start research into social media side	Louis+ anyone who wants to jump in	ongoing
✓ Continue progress	All	Ongoing
✓		

Other Information

meeting lasted one hour
