Finance Managers Comments:

The team had predicted 43.5 hours for this week, week 4 of iteration 2.
We have gone under this week by 20.5 hours but in total is over on estimated hours by 32 for the entire project.
At then end of last week, the team had an extra £336.54, this week we are still in the positive but from the extra work that has gone in this week we are at £592.79 extra in the pot, adding to our redundancy.

The reason the team has gone under this week is due to the entire team effort being direrted to another module assignment brought about by Covid-19. This was unexpected and unforeseen in our estimations. However the team now has this redundancy in hours, where stories not completed this week must be pushed and made up in either the last week of this Iteration or the first weeks of Iteration 3. Some progress has been made this week but nothing substantial.

The team has the hours available to catch up to where is should be but story estimates are going over in several areas. Specifics on this will be left to the team lead.

Project Managers Comments:

Currently we are behind in our estimations on where we should be in the development of the application. The decision has been made to move the Healthy Living feature to the bottom of the plan as our idea of what the application is has changed since first conception. The change log has been updated to reflect these changes. Due to this, more hours from the second iteration should be available to put in to catching up. More pressure will need to be applied in areas to try and speed up development while not impacting the quality of the application and the ability for members of the team to focus in other areas of study. With some of the best developers tied up in big features, moving resources around to try and move things along will be tricky.
