Total: **38:15:00**   Billable: **38:15:00**   Amount: **478.13 GBP**

Finance Managers Comments:

The team had predicted 47.25 hours for this week, starting Iteration 2. Taking our previous weeks balance into account, the team is now under our predicted hours by 5.75 hours.

Compared with our total predicted location, the team has an extra £1,064.67 in the bank. Again this is mainly due to the team selling modules at an excellent price and this retains the buffer to enable extra labour hours as and where we require them in order to deliver the product envisioned in the tender presentation.

Analysing the teams position with respect to the Financial Business Plan, we are behind in our expected position as we should be well under way with the social aspect of the application. However as the team has pushed the meal planner back to iteration 2, we are where we should be taking this into account. The strong financial position of the team should enable the team to catch up to our predicted position as members are able to put in the extra hours required to get to this position.

Project Managers Comments:

Observations made by the Financial Manager are accurate and with big features like the meal planner and the social aspect being done now or coming up, The extra funds will cover any problems that arise in the coming development time.
