Peer Review Check

Story:	C14 & C22	Date:	25/3/20

Story Checklist:			

Description   Edit

As a user, I want recommended storage and reheating instructions for each meal to make the process easier.

Estimated time frame: 2 hours

Tests   Hide completed items   Delete

100%
- ☑ Ensure that each recipe has the correct information for health and safety reasons
- ☑ simulate selecting a recipe to check the information is present and correct

Add an item

Tests   Hide completed items   Delete

100%
- ☑ Ensure this information is available from meals the user has cooked before
- ☑ Ensure information page can be opened and closed without interrupting the functionality of the rest of the application

Add an item

Requirements   Hide completed items   Delete

100%
- ☑ The best method to keep the ingredients fresh can be recommended to the users

Add an item

Requirements   Hide completed items   Delete

100%
- ☑ Once a meal preparation phase has been completed the user should be told information on storage and reheating instructions
- ☑ The user should be able to re-navigate back to this information for all recipe the user has cooked

Add an item

Tests

- Check each recipe has this information given to the user once the cooking phase is complete
  - Test that when the cooking is complete the information is available for the user to see
- Ensure information page can be opened and closed without interrupting the functionality of the rest of the application
  - Ensures that the page opens without causing errors or issues in any other part of the code

Comments/Issues/Notes:	

C14 - **Enable Meal Planner** As a user I want to be able to see the all portions in a recipe with their typical expiry date and get the methods on how to keep the recipes fresh, like if I am able to freeze it so I know how many days it will last before going off

👁 ☰ ☑ 3/3   JP

C22 - **Enable Meal Planner** As a user, I want recommended storage and reheating instructions for each meal to make the process easier.

👁 ☰ ☑ 4/4   JP
