Test Report Title:	Time Frame		Date	09/04/20
User story:	C17			
Unit Test Results:				

Three automatic Espresso tests with 0 error.
The aim of test:
- Check whether the recipe appears in the correct type fragment, like the recipe set as breakfast in the database can be shown in the breakfast fragment.
- Check whether the recipe in the type fragment can be added successfully to the meal plan.

The process of test:
- Long click the first "+" image in the meal plan and then the breakfast fragment appears which contains two lines, breakfast recipes and favourite recipes respectively. Choose one of the recipes and click the ADD button, the recipe can be added to the meal plan successfully.
- Long click the second "+" image in the meal plan and then the lunch fragment appears which contains two lines, lunch recipes and favourite recipes respectively. Choose one of the recipes and click the ADD button, the recipe can be added to the meal plan successfully.
- Long click the third "+" image in the meal plan and then the dinner fragment appears which contains two lines, dinner recipes and favourite recipes respectively. Choose one of the recipes and click the ADD button, the recipe can be added to the meal plan successfully.

Other Testing done:

Manual Testing:
Long click a blank "+" image in the meal plan and add a wanted recipe. It works well.
Long click the chosen recipe instead of a blank "+" image. The recipe will be deleted and choose a new one to replace it.

Comments:

Short clicking a blank "+" image in the meal plan will transacate to the recipe fragment and long clicking a blank "+" image in the meal plan will transacate to the type fragments.
