- First Iteration Release

Handwritten note: "— gft plan"
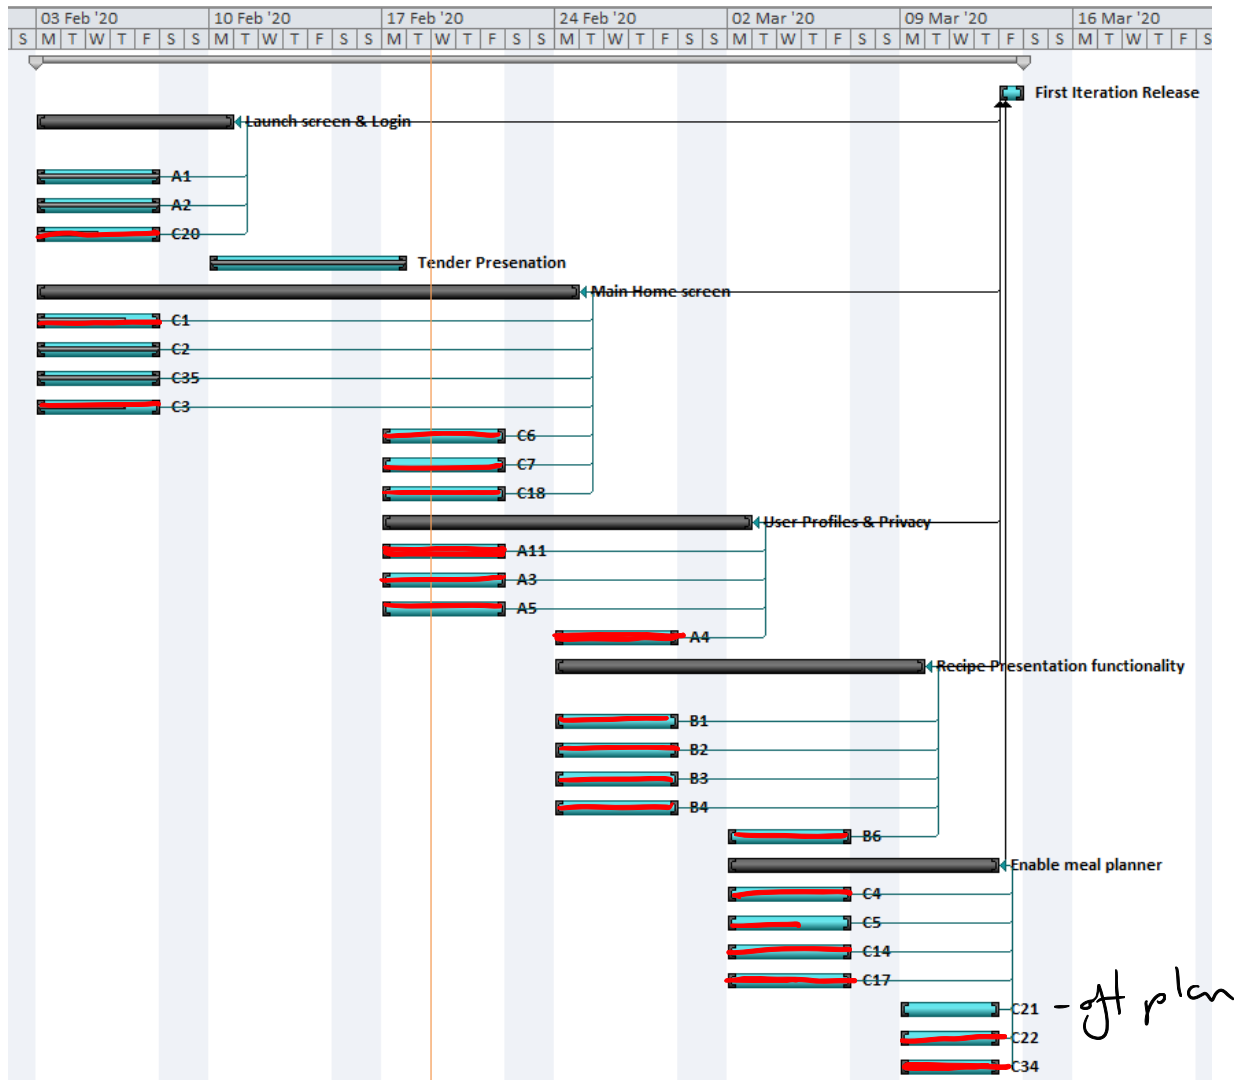

2nd Iteration
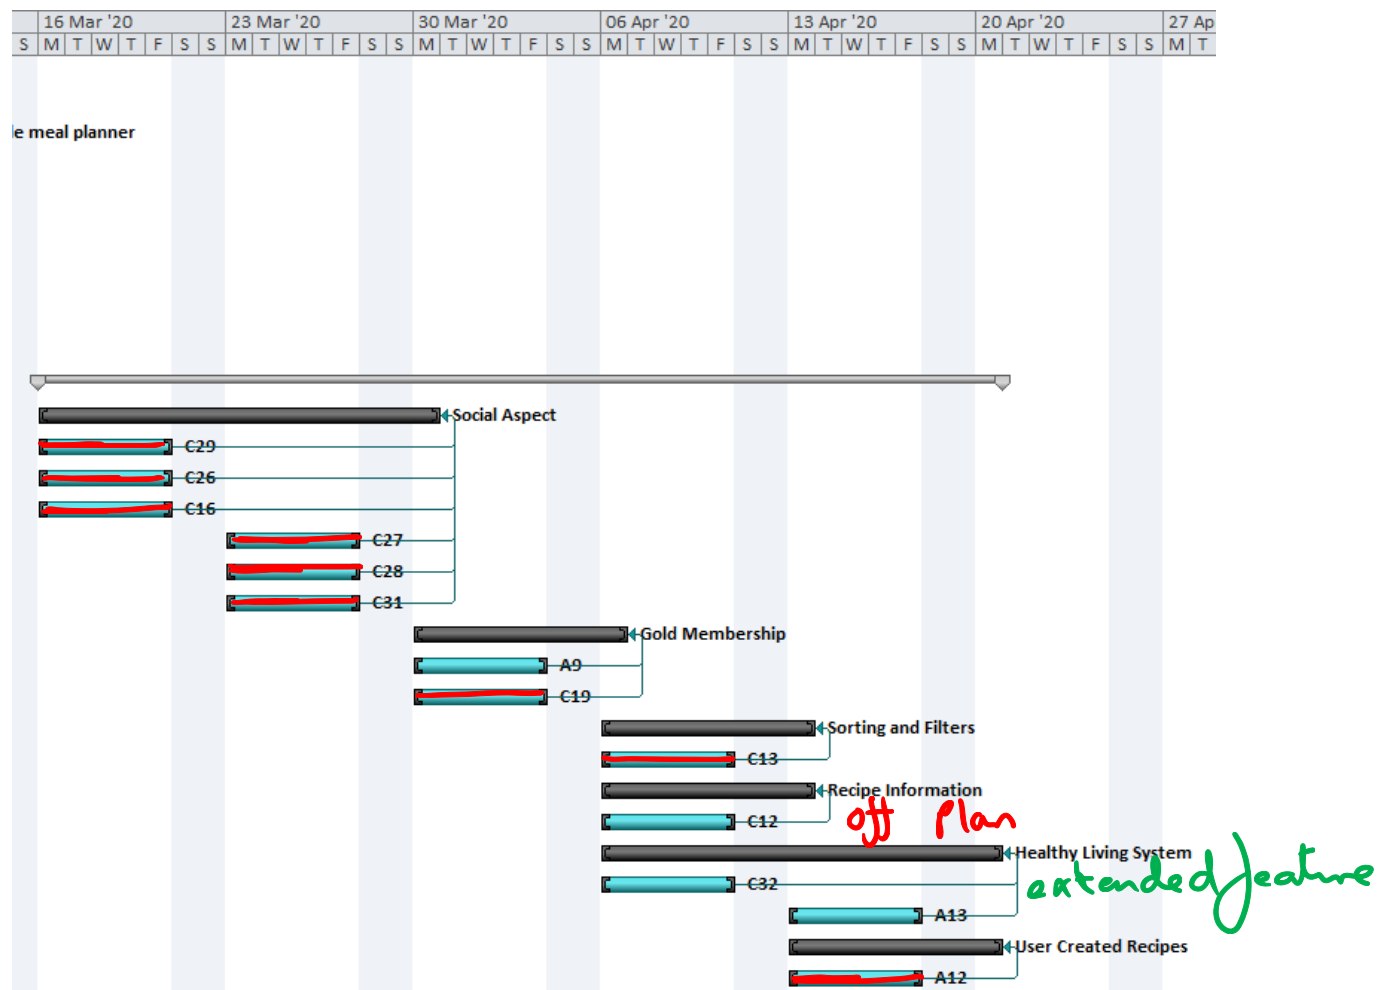

Healthy living system is to be pushed back to a further release as more of the teams focus was on the social aspect of the application. The marketing survey backs this decision up due to people preferring a social media platform. The healthy Living system will be the back bone of the next phase after release.

3rd Iteration

Notification system only slightly implemented due to the lack of time. To be properly implemented after release as an urgent update.

Recipe suggestion algorithm to be better researched to be implemented in the next phase of development.

Icons for ingredients is a small luxury if the company can afford to implement. Adds little to the overall worth of the application. Features and functionality come first.
